

2019 Organic Cannabis Recipe

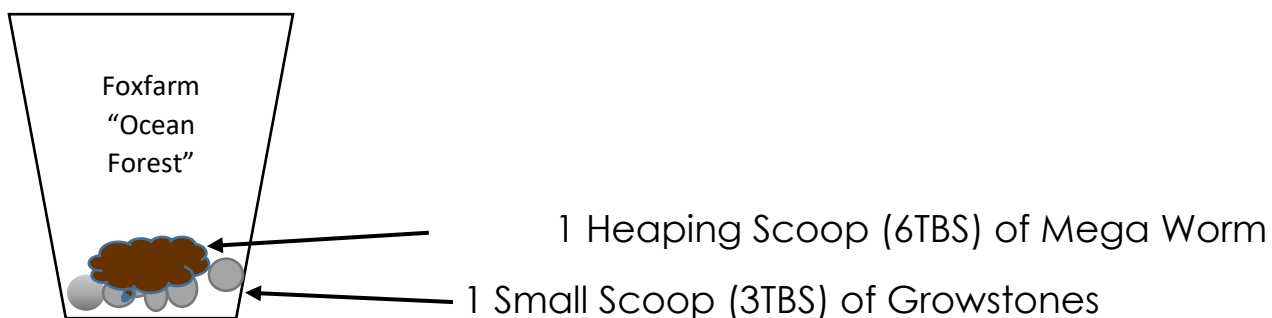

Love: The first and most important ingredient is love, if you can give your plants love they will love you back, and it will also show in the end result.

Time: The second ingredient is time, you must be able to give time to your plants. The more time you spend tending to your plants, the more you will be rewarded in the end.

Water: Water is a key element to plants and all life, our water is structured (Natural Action Technologies) then we use several filters (Apec Green Coco, Hydro-logic Tall Boy) to remove chlorine and chloramides. Then the water is RO'd (Hydro-logic Stealth reverse osmosis) and restructured using a Dynamically Enhanced Water Structure unit at the end of a hose. All plants are hand watered.

Containers: 1 ½ Gallon White Square

Medium: Foxfarm Ocean Forest Potting Soil, 1 Heaping Scoop Mega Worm, 1 Scoop Growstones

Oregonism's (Roots Organics) sprinkled on new roots before transplant.

Ingredients:

Roots Organics: G=Buddah Grow B=Buddah Bloom T=Trinity X=Extreme Serene
H=HP2 P=HPK A=Ancient Amber

Veg Feeding/Spray:

Spray = 1 tsp Einstein oil, 1 tsp of Thrive Alive B1, 2 drops of "Rain" by Roots Organics, 1 smashed Scorpion Trinidad Moruga Pepper or 1 Thai Chili Pepper*Use with Caution. Spray every 2 days 1 hour before lights on or as needed. Can also spray 1 hour before lights off.

Every Monday give Mothers: G=8TBS T=4TBS *per 4.5 gallons of water

Every Other Week add A=4TBS *per 4.5 gallons of water

Flower Feeding:

Feeding schedule is broken into 2 segments "Feed A" and Feed B" all tsp per 4.5 Gallons.

Each plant gets a "big gulp", around 32fl oz.

1 bucket feeds 20 plants, 3 buckets per night = 60 plants

Feed on Monday, Tuesday, Wednesday (180 plants), then as needed on Thursday, Friday.

Top off other plants (Week 1 and 6-8's) with clear water throughout the week.

Aerate on Wednesday and Sunday (lightly pick top soil)

Ideal week:

1 feeding (if Feed A or Feed B, clear water others), 1 day off, 1 clear water, 1 day off (aerate), 1 clear water, 1 day off (aerate).

Saturday and Sunday use just clear water *mix in Nematodes (at night) every other week.

Spray all week 1-2's (Monday, Tuesday)

Spray as needed on week 2-4's (Monday, Tuesday)

Spray Clear water on week 4-6's only as needed.

Week 1-2 is clear water (pic below)

Feed A is a plant from week 2-4 (pic below)

Feed A recipe = G=5 A=4 B=4 T=4 X=4 H=4 *tsp per 4.5 gallon

Feed B is a plant from week 4-6 (pic below)

Feed B recipe = G=5 B=6 T=4 X=4 P=4 *tsp per 4.5 gallon

Week 6-8 is clear water (pic below)

Ideal Grow Temperatures:

Daytime (lights on) 76-86 50-70% Relative Humidity

Night (lights off) 76-80 40-50 Relative Humidity

Work Day:

Empty all water, dehu's, AC's

Check all air intake, flows, and temperatures 80+ day 70+ night

Water or Feed (based on above)

Grow, Prune/Aerate, rotate, trim

Check dryer, rotate drying with newly trimmed, new in the back old in the front.

Enjoy a fresh bowl!

Notes on Strains:

Chocolate Thai – Likes hot, lots of water (everyday), dislikes nute spray, clear spray preferred. Light on nutrients.

Supreme Dream – Likes hot, moderate water (every other day) loves sprays and nutrients.

Stony Diesel – Likes hot and dry, light/ low water, light spray, medium nutrients

GabeFruit – Likes Hot and dry, light nutrients, likes sprays

Banana Slug – Likes Hot and Cold, loves sprays and nutrients.

Guerilla Gloo #4 – Like hot and dry, loves sprays, loves nutrients.

Grape Ape – Likes hot with cold nights, lots of water, loves spray and nutrients.

Stony Cookies – Likes hot and wet, light nutrients, loves spray.

Bubblegum – Loves nutrients and sprays, terminal nug!
